WOOD WINDOWS

Wood:

Costs-\$\$\$\$

- Most expensive option due to material costs, craftsmanship, and maintenance.
- Ideal for a classic, high-end look, wood windows offer excellent insulation and can be customized with stains and finishes. Best for traditional or luxury homes but require more maintenance.

Selections at:

[Marvin Catalog](#)

FIBERGLASS WINDOWS

Fiberglass:

Costs-\$\$\$

- More affordable than wood but still premium-priced.
- A high-performance option that combines the strength of aluminum with the insulation of wood. Extremely durable, low-maintenance, and resistant to warping, making it ideal for extreme climates.

Selections at:

Marvin Essential Fiberglass

ALUMINUM WINDOWS

Aluminum:

Costs-\$\$

- Mid-range pricing, often cheaper than fiberglass and wood.
- Best for modern, sleek designs, aluminum windows are strong, durable, and lightweight. They resist corrosion but offer less insulation compared to other materials.

VINYL WINDOWS

Vinyl:

Costs-\$

- Most budget-friendly choice with good durability and energy efficiency.
- A cost-effective, low-maintenance option with solid energy efficiency. Great for budget-conscious homeowners looking for durability and performance without frequent upkeep.
- Limited customization but low maintenance and cost-effective.
